Counter Jihad

America's Military Experience in Afghanistan, Iraq, and Syria

BRIAN GLYN WILLIAMS

March 2018 400pp

24 illus.

9780812224207 NIP £20.99

Haney Foundation Series

University of Pennsylvania Press

Counter Jihad is the first history of America's military operations against radical Islamists, from the Taliban-controlled Hindu Kush Mountains of Afghanistan, to the Sunni Triangle of Iraq, to ISIS's headquarters in the deserts of central Syria, giving both generalists and specialists an overview of events that were followed by millions but understood by few. Williams provides the missing historical context for the rise of the terror group ISIS out of the ashes of Saddam Hussein's secular Baathist Iraq, arguing that it is only by carefully exploring the recent past can we understand how this jihadist group came to conquer an area larger than Britain and spread havoc from Syria to Paris to San Bernardino.

Objects of War

& TARA ZAHRA

May 2018 344pp

32 b&w halftones

Cornell University Press

What new insights can historians gain about the past by thinking about things? A central object of modern warfare is the radical destruction and transformation of the material world. And yet we know little about the role of material culture in the history of war and forced displacement. *Objects of War* illuminates the ways in which people have used things to grapple with the social, cultural, and psychological upheavals wrought by war and forced displacement. Chapters consider theft and pillaging as strategies of conquest; soldiers' relationships with their weapons; and the use of clothing and domestic goods by prisoners of war, extermination camp inmates, freed people and refugees to make claims and to create a kind of normalcy.

Remembering World War I in America

KIMBERLY J. LAMAY LICURSI

March 2018 300pp

4 illus., 4 tables, 2 appendixes

9780803290853 HB £44.00

Studies in War, Society, and the Military

University of Nebraska Press

Explores the American public's collective memory and common perception of World War I by analyzing the extent to which it was expressed through the production of cultural artifacts related to the war. Through the analysis of four vectors of memory—war histories, memoirs, fiction, and film—Lamay Licursi shows that no consistent image or message about the war ever arose that resonated with a significant segment of the American population. In the end Americans emerged from the interwar years with limited pockets of public memory about the war that never found compromise in a dominant myth.

The Control Agenda

A History of the Strategic Arms Limitation Talks

MATTHEW J. AMBROSE

April 2018 280pp

9781501713743 HB £36.00

Cornell University Press

A sweeping account of the history of the Strategic Arms Limitation Talks (SALT), their rise in the Nixon and Ford administrations, their downfall under President Carter, and their powerful legacies in the Reagan years and beyond. Matthew Ambrose pays close attention to the interplay of diplomacy, domestic politics, and technology, and finds that the SALT process was a key point of reference for arguments regarding all forms of Cold War decision making. Ambrose argues elite U.S. decision makers used SALT to better manage their restive domestic populations and to exert greater control over the shape, structure, and direction of their nuclear arsenals.
