In *Can Politics Be Thought?*—published in French in 1985 and appearing here in English for the first time—Alain Badiou offers his most forceful and systematic analysis of the crisis of Marxism. Distinguishing politics as an active mode of thinking from the political as a domain of the state, Badiou argues for the continuation of Marxist politics. In so doing, he shows why we need to recapture the emancipatory hypothesis of Marx's original gesture in order to actualize its radical potential. This volume also includes Badiou's "Of an Obscure Disaster: On the End of the Truth of the State," in which he rebuts claims of Communism's death after the fall of the Soviet Union.

Democracy and Truth

A Short History

SOPHIA ROSENFELD

December 2018 184pp

9780812250848 £16.99 HB

UNIVERSITY OF PENNSYLVANIA PRESS

Citizens of democracies increasingly inhabit a public sphere teeming with competing claims and counterclaims, with no institution possessing the authority to settle basic disputes in a definitive way.

The problem may be novel in some of its details, but the challenge of determining truth in a democratic world has a backstory. In this lively and illuminating book, Rosenfeld explores a longstanding and largely unspoken tension at the heart of democracy between the supposed wisdom of the crowd and the need for information to be vetted and evaluated by a learned elite made up of trusted experts.

In four bracing chapters, Rosenfeld substantiates her claim by tracing the history of the vexed relationship between democracy and truth. Taking a broad sweep from the period prior to the eighteenth-century Age of Revolutions through to the troubling trends that have led to the rise of our "post-truth" public life. Rosenfeld concludes by offering suggestions for how to defend the idea of an extra-political truth against the forces that would undermine it.

Neoliberalism's Demons

On the Political Theology of Late Capital

ADAM KOTSKO

September 2018 184pp

9781503607125 £16.99 PB

9781503604810 £57.00 HB

STANFORD UNIVERSITY PRESS

By both its supporters and detractors, neoliberalism is usually considered an economic policy agenda. Kotsko argues that it is much more than that: a complete worldview, neoliberalism presents the competitive marketplace as the model for true human flourishing. And it has enjoyed great success: from the struggle for "global competitiveness" on the world stage down to our individual practices of self-branding and social networking, neoliberalism has transformed every aspect of our shared social life.

The book explores the sources of neoliberalism's remarkable success and the roots of its current decline. By tracing the political and theological roots of the neoliberal concept of freedom, Adam Kotsko offers a fresh perspective, one that emphasizes the dynamics of race, gender, and sexuality. More than that, he accounts for the rise of right-wing populism, arguing that, far from breaking with the neoliberal model, it actually doubles down on neoliberalism's most destructive features.

9781503607101 £18.99 PB

9781503606265 £65.00 HB

STANFORD UNIVERSITY PRESS

Speculation is often associated with financial practices, but Adkins makes the case that it not be restricted to the financial sphere. It argues that the expansion of finance has created a distinctive social world, one that demands a speculative stance toward life in general. Replacing a logic of extraction, speculation changes our relationship to time and organizes our social worlds to maximize the productive capacities of populations around flows of money for finance capital. Speculative practices have become a matter of survival, and defining features of our age are hardwired to their operations—stagnant wages, indebtedness, the centrality of women's earnings to the household, workfarism, and more. Examining five features of our contemporary economy, Adkins reveals the operations of this speculative rationality. Moving beyond claims that indebtedness is intrinsic to contemporary life and vague declarations that the social world has become financialized, Adkins delivers a precise examination of the relation between finance and society, one that is rich in empirical and analytical detail.
