Loving Justice

Legal Emotions in William Blackstone's England

KATHRYN D. TEMPLE

June 2019 280pp

9781479895274 £37.00 HB

NEW YORK UNIVERSITY PRESS

William Blackstone's masterpiece, Commentaries on the Laws of England (1765–1769), famously took the “ungodly jumble” of English law and transformed it into an elegant and easily transportable four-volume summary. Soon after publication, the work became an international monument not only to English law, but to universal English concepts of justice and what Blackstone called “the immutable laws of good and evil.” Most legal historians regard the *Commentaries* as a brilliant application of Enlightenment reasoning to English legal history. *Loving Justice* contends that Blackstone's work extends beyond making sense of English law to invoke emotions such as desire, disgust, sadness, embarrassment, terror, tenderness, and happiness. By enlisting an affective aesthetics to represent English law as just, Blackstone created an evocative poetics of justice whose influence persists across the Western world. In doing so, he encouraged readers to feel as much as reason their way to justice.

INDIANA UNIVERSITY PRESS

As Irish republicans sought to rid the country of British rule and influence in the early 20th century, a clear delineation was made between what was “authentically” Irish and what was considered to be English influence. As a member of the Anglo-Irish elite who inhabited a precarious identity somewhere in between, R. M. Smyllie found himself having to navigate the painful experience of being made to feel an outsider in his own homeland. Smyllie's role as an influential editor of the *Irish Times* meant he had to confront most of the issues that defined the Irish experience, from Ireland's neutrality during World War II to the fraught cultural claims surrounding the Irish language and literary censorship. In this engaging consideration of a bombastic, outspoken, and conflicted man, Caleb Wood Richardson offers a way of seeing Smyllie as representative of the larger Anglo-Irish experience. Richardson explores Smyllie's experience in a German internment camp in World War I, his foreign correspondence work for the *Irish Times* at the Paris Peace Conference, and his guiding hand as an advocate for cultural and intellectualism.

The Everyday Nationalism of Workers

9781503609051 £74.00 HB

STANFORD UNIVERSITY PRESS

Maarten Van Ginderachter upends assumptions about how European nationalism is lived and experienced by ordinary people—and the bottom-up impact these everyday expressions of nationalism exert on institutionalized nationalism writ large. Drawing on sources from the major urban and working-class centers of Belgium, Van Ginderachter uncovers the everyday nationalism of the rank-and-file of the socialist Belgian Workers Party between 1880 and World War I, a period in which Europe experienced the concurrent rise of nationalism and socialism as mass movements. Analyzing sources from—not just about—ordinary workers, Van Ginderachter reveals the limits of nation-building from above and the potential of agency from below. With a rich and diverse base of sources (including workers' “propaganda pence” ads that reveal a Twitter-like transcript of proletarian consciousness), the book covers a variety of experiences of, and responses to, nationhood—showing all the complexity of socialist workers' ambivalent attitudes towards and engagement with nationhood, patriotism, ethnicity and language.

What did it mean to be a spectator during the lifetime of Shakespeare or of Aphra Behn? In *Early Modern Spectatorship* contributors use the idea of spectatorship to reinterpret canonical early modern texts and bring visibility to relatively unknown works. While many early modern spectacles were designed to influence those who watched, the very presence of spectators and their behaviour could alter the conduct and the meaning of the event itself. In the case of public executions, for example, audiences could both observe and be observed by the executioner and the condemned. Drawing on work in the digital humanities and theories of cultural spectacle, these essays discuss subjects as various as the death of Desdemona in *Othello*, John Donne's religious orientation, Ned Ward's descriptions of London, and Louis Laguerre's murals painted for the residences of English aristocrats. A lucid exploration of subtle questions, *Early Modern Spectatorship* identifies, imagines, and describes the spectator's experience in early modern culture.
