### Inventing Exoticism

Geography, Globalism, and Europe's Early Modern World

**BENJAMIN SCHMIDT**

Material Texts

January 2015 448pp 24 color, 179 b/w illus.

UNIVERSITY OF PENNSYLVANIA PRESS

Illustrated with more than two hundred images of engravings, paintings, ceramics, and more, *Inventing Exoticism* shows, in vivid example and persuasive detail, how Europeans came to see and understand the world at an especially critical juncture of imperial imagination. At the turn to the eighteenth century, European markets were flooded by books and artifacts that described or otherwise evoked non-European realms. *Inventing Exoticism* meticulously analyzes these, while further identifying the particular role of the Dutch in the business of exotica. By scrutinizing these materials from the perspectives of both producers and consumers—and paying close attention to processes of cultural mediation—*Inventing Exoticism* interrogates traditional postcolonial theories of knowledge and power. It proposes a wholly revisionist understanding of geography in a pivotal age of expansion and offers a crucial historical perspective on our own global culture as it engages in a media-saturated world.

### Reimagining Livelihoods

*Reimagining Livelihoods* argues that the “hegemonic trio” of economy, society, and environment not only fails to describe the actual world around us but poses a tremendous obstacle to enacting a truly sustainable future. In a rich blend of ethnography and theory, *Reimagining Livelihoods* engages with questions of development in the state of Maine to trace the dangerous effects of contemporary stories that simplify and domesticate conflict. Drawing in part on his own participation in the struggle over the Plum Creek Corporation’s “concept plan” for a major resort development on the shores of Moosehead Lake in northern Maine, Ethan Miller articulates a rich framework for engaging with the ethical and political challenges of building ecological livelihoods among diverse human and nonhuman communities. In seeking a pathway for transformative thought that is both critical and affirmative, *Reimagining Livelihoods* provides new frames of reference for living together on an increasingly volatile Earth.

UNIVERSITY OF MINNESOTA PRESS

*Cyclescapes of the Unequal City* contextualizes and critically examines the new wave of bicycling in American cities, exploring how bicycle infrastructure planning has become a key symbol of—and site of conflict over—uneven urban development. John G. Stehlin traces bicycling’s rise in popularity as a key policy solution for American cities facing the environmental, economic, and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia, and Detroit, he argues that the mission of bicycle advocacy has converged with, and reshaped, the urban growth machine around a model of livable, environmentally friendly, and innovation-based urban capitalism. *Cyclescapes of the Unequal City* speaks to a growing interest in bicycling as an urban economic and environmental strategy, its role in the politics of gentrification, and efforts to build more diverse coalitions of bicycle advocates. Grounding its analysis in both regional political economy and neighborhood-based ethnography, this book ultimately uses the bicycle as a lens to view major shifts in today’s American city.

Mumbai’s textile industry is commonly but incorrectly understood to be an extinct relic of the past. In *The Archive of Loss* Maura Finkelstein examines what it means for textile mill workers—who are assumed not to exist—to live and work during a period of deindustrialization. Finkelstein shows how mills are ethnographic archives of the city where documents, artifacts, and stories exist in the buildings and in the bodies of workers. Workers’ pain, illnesses, injuries, and exhaustion narrate industrial decline; the ways in which they live in tenements exist outside and resist the values expounded by modernity; and the rumors and untruths they share about textile worker strikes and a mill fire help them make sense of the industry’s survival. In outlining this archive’s contents, Finkelstein shows how mills, which she conceptualizes as lively ruins, become a lens through which to challenge, reimagine, and alter ways of thinking about the past, present, and future in Mumbai and beyond.
