Gender, War, and World Order

A Study of Public Opinion

RICHARD C. EICHENBERG

Motivated by the lack of scholarly understanding of the substantial gender difference in attitudes toward the use of military force, Richard C. Eichenberg has mined a massive data set of public opinion surveys to draw new and important conclusions. By analyzing hundreds of such surveys across more than sixty countries, *Gender, War, and World Order* offers researchers raw data, multiple hypotheses, and three major findings. Eichenberg poses three questions of the data: Are there significant differences in the opinions of men and women on issues of national security? What differences can be discerned across issues, culture, and time? And what are the theoretical and political implications of these attitudinal differences? Within this framework, *Gender, War, and World Order* compares gender difference on military power, balance of power, alliances, international institutions, the acceptability of war, defense spending, defense/welfare compromises, and torture.

Military Education and the British Empire, 1815-1949

Military education was the lifeblood of the armies, navies, and air forces of the British Empire and an essential ingredient for success in both war and peace. *Military Education and the British Empire* is the first major scholarly work to address the role of military education in maintaining the empire throughout the nineteenth and twentieth centuries. Bringing together the world's top scholars on the subject, this book places distinct national narratives – Canadian, Australian, South African, British, and Indian – within a comparative context. Ultimately, this book allows readers to consider the connections between education and empire from a transnational perspective. Common military education was the lifeblood of the armies, navies, and air forces of the British Empire. It permeated every aspect of the profession of arms and was an essential ingredient for success in both war and peace. *Military Education and Empire* is the first major scholarly work to address the role of military education in maintaining the empire throughout the nineteenth and twentieth centuries.

Quarters

The Accommodation of the British Army and the Coming of the American Revolution

When Americans declared independence in 1776, they cited King George III "for quartering large bodies of armed troops among us." In *Quarters*, John Gilbert McCurdy explores the social and political history behind charge, offering an authoritative account of the housing of British soldiers in America. Providing new interpretations and analysis of the Quartering Act of 1765, McCurdy sheds light on a misunderstood aspect of the American Revolution.

Quarters unearths the vivid debate in eighteenth-century America over the meaning of place. It asks why the previously uncontroversial act of accommodating soldiers in one's house became an unconstitutional act. In so doing, *Quarters* reveals new dimensions of the origins of Americans' right to privacy. It also traces the transformation of military geography in the lead up to independence, asking how barracks changed cities and how attempts to reorder the empire and the borderland led the colonists to imagine a new nation.

Signature Wounds

The Untold Story of the Military's Mental Health Crisis

DAVID KIERAN

April 2019 404pp

9781479892365 £27.99 HB

NEW YORK UNIVERSITY PRESS

Drawing on previously unreleased documents and oral histories, David Kieran tells the broad and nuanced story of the Army's efforts to understand and address these issues, challenging the popular media view that the Iraq War was mismanaged by a callous military unwilling to address the human toll of the wars. The story of mental health during this war is the story of how different groups—soldiers, veterans and their families, anti-war politicians, researchers and clinicians, and military leaders—approached these issues from different perspectives and with different agendas. It is the story of how the advancement of medical knowledge moves at a different pace than the needs of an Army at war, and it is the story of how medical conditions intersect with larger political questions about militarism and foreign policy. This book shows how PTSD, TBI, and suicide became the signature wounds of the wars in Iraq and Afghanistan, how they prompted change within the Army itself, and how mental health became a factor in the debates about the impact of these conflicts on US culture.

Prorokova analyzes how representational narratives have highlighted a humanitarian rationale behind American involvement in many wars, whether the stated goals were to free the oppressed from tyranny, stop genocide, or rid the world of terrorism. The book explores the gap between history—what allegedly happened—and the cultural mythology.

Scratch One Flattop

The First Carrier Air Campaign and the Battle of the Coral Sea

ROBERT C. STERN

Twentieth-Century Battles

June 2019 360pp

9780253039293 £37.00 HB

INDIANA UNIVERSITY PRESS

In *Scratch One Flattop* historian Robert C. Stern analyzes the Battle of the Coral Sea, the first major fleet engagement where the warships were never in sight of each other. Stern covers not only the action of the ships and their air groups but also describes the impact of this pivotal engagement.

Sovereignty and Command in Canada-US Continental Air Defence, 1940-57
